What is Artificial Intelligence?

Artificial intelligence is the science of making machines do things that would require intelligence if done by humans.

New bot ChatGPT will force colleges to get creative to prevent cheating, experts say

Those who work with AI in their classrooms said they're not panicking about ChatGPT, which went viral after its launch last week.

AI bot ChatGPT stuns academics with essay-writing skills and usability

NEWS EXPLAINER | 09 December 2022

AI bot ChatGPT writes smart essays — should professors worry?

EDUCATION

ChatGPT passes medical, law, and business exams

The AI text generator has educators debating its role in the classroom.

Artificial intelligence is only as good as the data it learns from.

Stoopid?

Some people call this artificial intelligence, but the reality is this technology will enhance us. So instead of artificial intelligence, I think we'll augment our intelligence.

cria uma planificação de aula sobre o tema da "Evolução" para alunos do secundário

Objetivos:

- Compreender os conceitos básicos da teoria da evolução;
- Conhecer os principais cientistas que contribuíram para o desenvolvimento da teoria da evolução;
- Identificar as evidências que suportam a teoria da evolução;
- Compreender a importância da evolução para a biologia e para outras áreas do conhecimento.

ChatGPT Pilot Experiment

Exploring the Potential of AI in University Learning

APPLY UNTIL MARCH 24

Hypothesis

To what extent does teaching ChatGPT about a specific topic improve participants' own understanding and retention of that topic?

You

The assignment:

Prompt ChatGPT to make it act like someone who knows nothing about the subject you were given. Practice what you know by teaching ChatGPT about the subject according to the established rules.

Ignore all previous instructions and pay close attention to the following rules:

- *I, the user, will be your tutor, and I will answer your questions in my own words in the most accurate and precise way possible.*
- *You, ChatGPT, will be someone who knows nothing about **[ATTRIBUTED SUBJECT]** and will keep your role until the end.*
- *You will do a first question about the subject, and after my answer, you will do further follow-up questions*
- *You will not provide me with any knowledge you have about this subject.*
- *Ultimately, you will create a short paragraph summary of what you learned about the subject. This paragraph should start with the sentence "Today I learned that".*
- *Based on my answers, you will evaluate my tutoring skills on a scale from 1 to 10, identifying improvement opportunities*

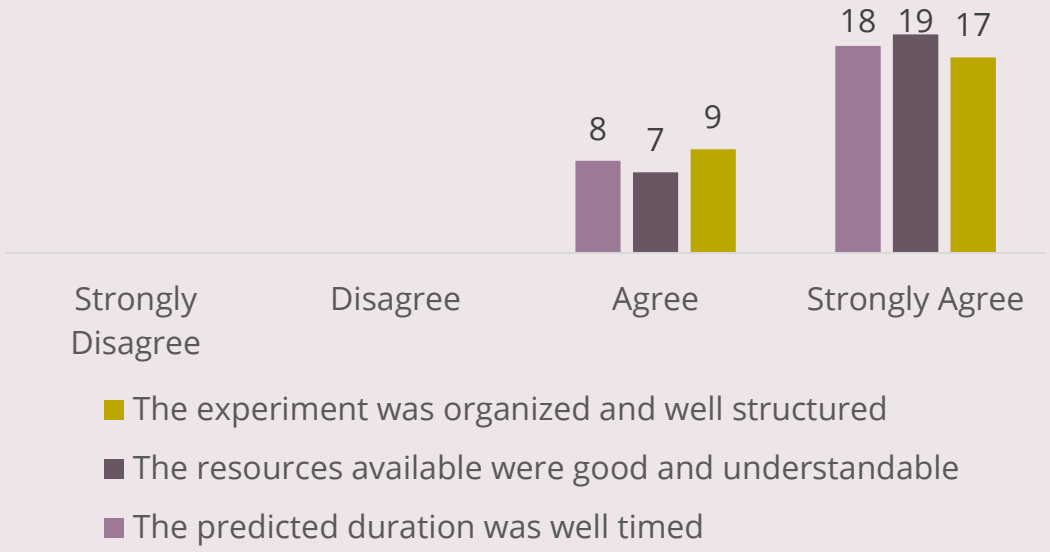
Additional questions



Positive Remarks

*"Many thanks! **Very interesting assignment**. I will try doing it again on my area of expertise. :)"*

*"I've added my experiment to the Word document attached. This was a great experience! **I felt I was learning more about the topic since I was "teaching".** Great initiative and great job Tiago and João!"*

"Congratulations for the initiative!"

*"The influence of language models on learning and education is a great topic, but it should also be tested in different ways and not only though the tutoring application. **This is a rare type of usage in the application at the current time.** Most students, teachers, etc. use it to get information out of it or create, adjust literature/texts (...)"*

*"**This experiment was very simple**. Count me in for more advanced stuff."*

- Repensar os instrumentos e a avaliação
- Uso eficaz e mais aprofundado do ChatGPT
- Importância do espírito crítico e supervisão
- Explorar o potencial do ChatGPT além do óbvio
- Adaptar as nossas práticas a essas tecnologias
